*Cassie Holt, PhD, MPH, CPH works in IQVIA's Real-World & Analytic Solutions team where she manages projects and studies utilizing global real-world data to generate faster insights, impacting both the scientific community and strategic decision-making within biopharma. In her current role, Dr. Holt's main goals are to generate the necessary real-world evidence to move the needle with key stakeholders and differentiate biopharma products / portfolios and to engage in data source owner collaboration efforts to identify and build new research and data networks. She is passionate about understanding real-world product use to ensure the right treatments are getting to the right patients. Dr. Holt has worked virtually during her career at IQVIA, and over the past five years, successfully navigated new project and teaming opportunities and three promotions. She has her Doctor of Philosophy and Masters in Public Health, Epidemiology from the University of Pittsburgh, and her Bachelor of Arts from Saint Vincent College. She is also Certified in Public Health. While offline, Dr. Holt enjoys reading, cooking, traveling, taking Pure Barre classes, and spending time with her husband and dog.*
