

## **Becki Filice**

Becki currently holds the position of SVP, Product and Portfolio Management at Aimmune Therapeutics, focused on advancing clinical stage programs in food allergy. In this role, she has responsibility for product leadership, project management and portfolio planning, and is a member of the Executive Committee. She has over 25 years of industry product development experience and has been involved in numerous regulatory approvals in a variety of therapeutic areas. Becki also has extensive experience in the areas of cross-functional team leadership, establishing and developing functions, process and systems implementation, and organizational change management. Before joining Aimmune, she was at SFJ Pharmaceuticals, where she had global responsibilities for project leadership, alliance management and new portfolio project evaluation, and was a member of the Executive Team. Prior to that she was at Achaogen, where she was a key executive involved in the funding and development of a novel antibiotic. She also spent fifteen years at Genentech, where she held a number of functional leadership roles, and served as a Project Team Leader for the Avastin® and Nutropin® products. Earlier in her career, Becki held management positions in clinical research with Ligand Pharmaceuticals and Syntex. She began her career as a clinical microbiologist at El Camino Hospital in Mountain View, California. Becki received her Bachelor's Degree in Microbiology from University of California at Davis, and holds an MBA from Santa Clara University. She has held Board positions in both industry and non-industry non-profit organizations, including serving on the Executive Board of the HBA in 2016 (Secretary) and 2017 (Vice President).
