

Leslie Bloom, PhD

Executive Director of Regulatory Chemistry Manufacturing and Controls

Pfizer

Leslie Bloom is an Executive Director of Regulatory Chemistry Manufacturing and Controls in Pfizer's Worldwide Safety and Regulatory Department. Leslie has held a variety of regulatory roles at Pfizer over the past 25 years. Her primary focus has been large and small molecule regulatory CMC, with roles in policy and general regulatory strategy adding to the breadth of her experience. She currently specializes in regulatory CMC leadership for biologics. Leslie and her team develop and implement worldwide regulatory strategies from initial investigational filings through registration and lifecycle support. Leslie and her team are also active in the external environment to drive project progression and harmonized regulatory approaches. Leslie holds a Ph.D. in Chemistry from Pennsylvania State University. She began her regulatory career at the US FDA. She was at FDA for three years prior to joining Warner-Lambert, a Pfizer legacy company.
