

Rick is a serial "intrapreneur" with 25 years of diverse healthcare experiences. He has enjoyed much success in roles that span Sales, Marketing, Strategy, New Product Development, Commercial Leadership, Entrepreneurial Start-Up Leadership and 'even' IT. Rick is a humble leader, who openly shares the wisdom he's gained from both his successes and failures. He and his family have been fortunate to spend extensive time in Canada, the US and Japan where Rick worked in several different sectors of healthcare. His current role is with J&J Consumer R&D. Though he is not an Engineer or Scientist, Rick's curiosity and comfort with ambiguity make him enthusiastic about creating solutions to complex problems. Rick's current area of focus at J&J is Business Model Innovation: helping the Consumer business think and act differently about the role that Technology can play in solving customer problems, delivering value across the healthcare continuum, and creating value.
