

Joni Rittler

Vice President, Supply Chain Management

rittlerj@email.chop.edu

Joni Rittler is the Vice President, Supply Chain Management for The Children's Hospital of Philadelphia. She has worked in healthcare materials management for over 20 years. She holds a bachelor's degree in Management of Information Technology from Eastern University and a Masters Degree in Healthcare Administration from St. Joseph's University.

Joni has held various supply chain management positions in the Philadelphia region as well as serving as the Vice President of Supply Chain Technology for Catholic Health Initiatives, a healthcare system that owns over 70 hospitals across the United States. Her accomplishments include design of business processes, development of shared service centers, optimization of group purchasing organization relationships, distribution and logistics planning, and implementation of Pick-to-Light technology and ERP systems. Through her efforts she has identified and reduced supply expenses achieving more than \$125M in a 3-year period for her previous employer and over \$60M in a 4-year period at CHOP.

Joni's current role at CHOP is to provide vision and leadership for an integrated supply chain across the organization. She works to ensure the purchase of the highest quality materials/services at the best cost, to establish standards of excellence, to design systems and metrics to measure both financial and operational performance, and to develop strategic internal and external alliances. She serves as the executive sponsor for the All Abilities Resource Group, an employee team working to raise awareness and provide education related to employment of people with disabilities. She serves on the Supply Executive Council for Vizient and the Supply Chain Leadership team for Children's Hospital Association (CHA). Additionally, she serves on the Executive Oversight Group which oversees the relationship between Vizient and CHA. She is an active member of Strategic Marketplace Initiatives, an industry group that sponsors the development of tools and practices to support the healthcare supply chain industry.
