

Soo Bang, MSHA, CA-AM
CELGENE Corporation

Soo Bang is Vice President, Business Strategy, Integration & Planning for the Global Pharmaceutical Development & Operations (GPDO). Soo has overall responsibility for the project management, operational excellence, EHS, technical commercialization and GPDO alliance management teams. Previously at Celgene, Soo held the role of Executive Director, Global Alliances, where she managed alliance relationships across Hem/Onc, I&I and Early Development, and was the alliance lead for numerous collaborations with clinical programs in both biologics and small molecules. In addition, she helped build the global alliance infrastructure and processes as one of the early members of the team. Previously, she was the Global Head of Clinical Site Contracts, where she led a global team responsible for contracts, budgets, central IRBs, and study start-up activities. Previous to Celgene, Soo served as the Global Investigator Lead at Pfizer, responsible for contract and outsourcing across all Pfizer business units, development operations functional service providers, and medical affairs. She also held various leadership positions at NYC Health & Hospitals Corp, Director of Clinical Trials at NYU Medical Center, and Winthrop University Health System. Soo also served as industry lead for the “Advancing the use of Central IRBs” for the Clinical Trials Transformation Initiative, a private public initiative with Duke and the FDA. Soo received her B.A. and M.S. from George Washington University and completed her fellowship at Johns Hopkins Health System. Soo is a certified Alliance Management Professional and has a green belt in Lean Six Sigma. She is also actively involved in the career development of others by leading mentorship programs within Celgene and through her strong support and involvement in the Healthcare Businesswomen’s Association (HBA).
